

**Amendments to the Claims**

This listing of claims will replace all prior versions of claims in the Application.

**Listing of Claims**

1-11. (Canceled)

12. (Withdrawn) A cartilage repair assembly as claimed in claim 11 wherein said demineralized bone matrix comprises bone powder having a size ranging from 200 to 850 microns and a weight ranging from 1% to 35% of the cartilage mixture.

13. (Withdrawn) A cartilage repair assembly comprising a sterile shaped structure of subchondral bone with an integral overlying cartilage cap, said shaped structure being dimensioned to fit in a drilled bore in a cartilage defect area so that said shaped bone and cartilage cap when centered in the bore does not engage the side wall of the bore in an interference fit, said shaped structure being treated to remove cellular debris and proteoglycans and sterile milled cartilage pieces mixed in a carrier surrounding said bone plug in said bore.

14. (Withdrawn) A cartilage repair assembly as claimed in claim 13 wherein said milled cartilage pieces are sized less than 1 mm.

15. (Withdrawn) A cartilage repair assembly as claimed in claim 13 wherein said cartilage is allograft cartilage.

16. (Withdrawn) A cartilage repair assembly as claimed in claim 13 wherein said cartilage is autologous cartilage.

17. (Withdrawn) A cartilage repair assembly as claimed in claim 13 wherein said shaped structure has a shape taken from a group consisting of a cylinder, an oval, a cruciate, and scallop.

18. (Withdrawn) A cartilage repair assembly as claimed in claim 13 wherein said milled cartilage pieces and carrier includes an additive taken from one or more of a group consisting of growth factors, human allogenic cells, human bone autologous marrow cells, human allogenic bone marrow cells, stem cells, demineralized bone matrix, cartilage, and insulin.

19. (Withdrawn) A cartilage repair assembly as claimed in claim 18 wherein said demineralized bone matrix comprises bone powder having a size ranging from 200 to 850 microns and a weight ranging from 1% to 35% of the cartilage mixture.

20. (Withdrawn) A cartilage repair assembly as claimed in claim 13 wherein said carrier includes a bioabsorbable carrier consisting of one or more of a group consisting of sodium hyaluronate, gelatin, collagen, chitosan, alginate, buffered PBS, Dextran or polymers.

21. (Withdrawn) A cartilage repair assembly as claimed in claim 13 wherein said milled cartilage is hyaline cartilage.

22. (Withdrawn) A cartilage repair assembly as claimed in claim 13 wherein said milled cartilage is fibrocartilage.

23. (Withdrawn) A cartilage repair assembly as claimed in claim 13 wherein said milled cartilage is a mixture of fibrocartilage and hyaline cartilage.

24. (Withdrawn) A cartilage repair assembly comprising a sterile shaped structure of subchondral bone and overlying integral cartilage cap, said shaped structure been dimensioned to fit in a drilled bore in a cartilage defect are so that said shaped bone and hyaline cartilage cap when centered in the bore can be rotated in said bore, said bone plug being treated to remove cellular debris and proteoglycans and sterile milled cartilage pieces mixed in a bioabsorbable carrier surrounding at least a portion of a side wall of shaped structure.

25. (Withdrawn) A cartilage repair assembly as claimed in claim 24 wherein said milled cartilage pieces are sized less than 1 mm.

26. (Withdrawn) A cartilage repair assembly as claimed in claim 24 wherein said cartilage is hyaline allograft cartilage.

27. (Withdrawn) A cartilage repair assembly as claimed in claim 24 wherein said milled cartilage is fibrocartilage.

28. (Withdrawn) A cartilage repair assembly as claimed in claim 24 wherein said milled cartilage is a mixture of fibrocartilage and hyaline cartilage.

29. (Withdrawn) A cartilage repair assembly as claimed in claim 24 wherein said cartilage is autologous cartilage.

30. (Withdrawn) A cartilage repair assembly as claimed in claim 24 wherein said shaped structure has a shape taken from a group consisting of a cylinder, an oval, a cruciate, and scallop.

31. (Withdrawn) A cartilage repair assembly as claimed in claim 24 wherein said milled cartilage pieces and carrier include an additive taken from one or more of a group consisting of growth factor, human allogenic cells, human bone marrow cells, human autologous bone marrow cells, demineralized bone matrix, cartilage, and insulin.

32. (Withdrawn) A cartilage repair assembly as claimed in claim 24 wherein said demineralized bone matrix comprises bone powder having a size ranging from 200 to 850 microns and a weight ranging from 1% to 35% of the cartilage mixture.

33. (Withdrawn) A cartilage repair assembly as claimed in claim 24 wherein said bioabsorbable carrier is one or more of a group consisting of sodium hyaluronate, gelatin, collagen, chitosan, alginate, buffered PBS, Dextran or polymers.

34. (Withdrawn) A cartilage repair assembly kit comprising a sterile shaped structure of allograft subchondral bone and an overlying cartilage cap, said structure being treated to remove cellular debris and proteoglycans and housed in a first sterile container and milled allograft cartilage pieces mixed in a carrier housed in a second sterile container, said first and second sterile containers being packaged together.

35. (Withdrawn) A cartilage repair assembly kit as claimed in claim 34 wherein said cartilage pieces are allograft hyaline cartilage.

36. (Withdrawn) A cartilage repair assembly kit as claimed in claim 34 wherein said carrier includes an additive taken from one or more of a group consisting of growth factors, human allogenic cells, human allogenic bone marrow cells, human autologous bone marrow cells, stem cells, demineralized bone matrix, cartilage, and insulin.

37. (Withdrawn) A cartilage repair assembly kit as claimed in claim 34 wherein said carrier is a bioabsorbable carrier taken from a group consisting of sodium hyaluronate, gelatin, collagen, chitosan, alginate, buffered PBS, Dextran or polymers.

38. (Withdrawn) A method of placing a preshaped allograft implant assembly in a cartilage defect, said assembly comprising a subchondral bone and an overlying cartilage

cap plug which has been treated to remove cellular debris and proteoglycans and minced cartilage in a carrier comprising the steps of: (a) drilling a hole in a patient at a site of a cartilage defect, a depth which equal to or less than the length of the bone and cartilage cap plug implant; (b) placing a preshaped osteochondral plug having a cross section which is less than the cross sectional area of the hole with a length which equal to the depth of the hole allowing the structure to be moveable within said bore in the cylindrical hole; and (c) placing a mixture of minced cartilage in a bioabsorbable carrier in the drilled cylindrical hole around the preshaped osteochondral plug.

39. (Withdrawn) A method as claimed in claim 38 wherein said hole is a cylindrical bore.

40. (Withdrawn) A method as claimed in claim 38 wherein said minced cartilage is allogenic.

41. (Withdrawn) A method as claimed in claim 38 wherein said minced cartilage is autologous.

42. (Withdrawn) A method as claimed in claim 38 wherein said assembly includes an additive consisting of one or more of a group consisting of growth factor, human allogenic cells, human bone marrow cells, demineralized bone matrix, cartilage, and insulin.

43. (Withdrawn) A method as claimed in claim 38 wherein said bioabsorbable carrier is taken from one or more of a group consisting of sodium hyaluronate, gelatin, collagen, chitosan, alginate, buffered PBS, Dextran or polymers.

44. (Currently Amended) In a cartilage repair implant which includes an allograft bone plug having a subchondral bone base and an overlying cartilage cap, the improvement wherein said plug is decellularized ~~such that said bone base and said cartilage cap are substantially free of cellular material~~, said decellularized plug including a sidewall that is sized and shaped such that a first portion of said sidewall engages a bore drilled in a cartilage defect area of host tissue and such that a second portion of said sidewall does not engage the bore, thereby forming a space between the bore and said second sidewall portion, the improvement further comprising an allograft milled cartilage mixture, which includes a biocompatible carrier, at least partially filling the space between the bore and said second sidewall portion of said decellularized plug to thereby enhance tissue integration between said decellularized plug and adjacent host tissue.

45. (Currently Amended) The improved cartilage repair implant of Claim 44, wherein said cartilage cap of said decellularized plug [is substantially free of] has been treated to remove chondrocytes.

46. (Currently Amended) The improved cartilage repair implant of Claim 44, wherein said bone base and said cartilage cap of said decellularized plug [are substantially free of] have been treated to remove pluripotent mesenchymal cells.

47. (Currently Amended) The improved cartilage repair implant of Claim 44, wherein said bone base and said cartilage cap of said decellularized plug [are substantially free of] have been treated to remove proteoglycans.

48. (Previously Presented) The improved cartilage repair implant of said Claim 44, wherein said decellularized plug is lyophilized.

49. (Previously Presented) The improved cartilage repair implant of Claim 48, wherein said decellularized plug has a water content within a range of about 0.1% to about 8%.

50. (Previously Presented) The improved cartilage repair implant of Claim 44, wherein said milled cartilage mixture comprises cartilage particles having a size less than 1 mm.

51. (Previously Presented) The improved cartilage repair implant of Claim 44, wherein said carrier comprises sodium hyaluronate.

52. (Previously Presented) The improved cartilage repair implant of Claim 44, wherein said carrier comprises gelatin.

53. (Previously Presented) The improved cartilage repair implant of Claim 44, wherein said carrier comprises collagen.

54. (Previously Presented) The improved cartilage repair implant of Claim 44, wherein said carrier comprises chitosan.

55. (Previously Presented) The improved cartilage repair implant of Claim 44, wherein said carrier comprises alginate.

56. (Previously Presented) The improved cartilage repair implant of Claim 44, wherein said carrier comprises buffered PBS.

57. (Previously Presented) The improved cartilage repair implant of Claim 44, wherein said carrier comprises Dextran.

58. (Previously Presented) The improved cartilage repair implant of Claim 44, wherein said carrier comprises polymers.

59. (Previously Presented) The improved cartilage repair implant of Claim 44, wherein said decellularized plug has a cylindrical shape.

60. (Previously Presented) The improved cartilage repair implant of Claim 44, wherein said decellularized plug has a diameter in a range of 1 mm to 30 mm.

61. (Previously Presented) The improved cartilage repair implant of Claim 44, wherein said decellularized plug has a diameter in a range of 4 mm to 10 mm.

62. (Previously Presented) The improved cartilage repair implant of Claim 44, wherein said decellularized plug has an oval cross-sectional shape.

63. (Previously Presented) The improved cartilage repair implant of Claim 44, wherein said decellularized plug has a cruciate cross-sectional shape.

64. (Previously Presented) The improved cartilage repair implant of Claim 44, wherein said decellularized plug has a scalloped cross-sectional shape.

65. (Previously Presented) The improved cartilage repair implant of Claim 44, wherein said milled cartilage mixture comprises hyaline cartilage particles.

66. (Previously Presented) The improved cartilage repair implant of Claim 44, wherein said milled cartilage mixture comprises fibrocartilage particles.

67. (Previously Presented) The improved cartilage repair implant of Claim 44, wherein said milled cartilage mixture comprises fibrocartilage particles and hyaline cartilage particles.

68. (Previously Presented) The improved cartilage repair implant of Claim 44, wherein said milled cartilage mixture comprises growth factors.
